CAREER OBJECTIVE

I am a graduate of Mechanical Engineering and an accomplished Software Engineer with expertise in a variety of programming languages. I have successfully completed diverse projects across multiple industries, contributing significantly to the advancement of my skills and the technological landscape. Additionally, I am an avid Web3 enthusiast.

I possess a deep understanding of API integration principles and have experience deploying applications on Amazon Web Services (AWS) using both Lambda and EC2 instances. I am proficient in leveraging Laravel Vapor for serverless deployment.

My enthusiasm for learning is unyielding, and I approach challenges with a prolific mindset. My primary objective is to consistently contribute my utmost abilities to the enhancement of organizations, as I have consistently demonstrated in the past. I thrive in collaborative team environments, where I can actively participate in the development, design, construction, and maintenance of applications, all while ensuring a seamless and user-friendly experience.

CORE COMPETENCE / SKILLS AND INTERESTS:

- Skilled in Microsoft Office (MS WORD , MS EXCEL)
